Continuation Sheet (PTO-303) 009/529,234

Continuation of 2. NOTE: The passage in Claim 1 that discloses the film as having "an elution rate of more than about 50% per 10 minutes" and the inclusion in Claim 4 of additional compounds raise new issues that would require further consideration and/or search.

Continuation of 10. Other: Applicants request reconsideration and removal of the finality of the Office Action filed June 18, 2002. It is noted that Applicants originally claimed a film preparation that comprises saccharide. The claims were rejected against art that comprise polysaccharides which embraces the broad term "saccharide". Applicants amended the claims to limit the film preparation to the presence of monosaccharide or oligosaccharide, which required the Examiner to perform a further search of the film preparation that comprises a monosaccharide or an oligosaccharide. Hence, Applicants amendment filed March 27, 2002 necessitated the new grounds of rejection presented in the Office action that was made final. Accordingly, the finality of the Office action filed June 18, 2002 is deemed proper.
